BIGDAWG SPECIFICATIONS

The BigDawg High Performance Computing Cluster (HPCC) is among the University's top research resources. This lightning-fast computing cluster supports computationally intensive research activities, and radically reduces the time needed to process and analyze information. Using BigDawg allows researchers to complete tasks that once required days of processing time, in just hours. Although BigDawg is not as large as some of the mega-clusters at other academic institutions, this computing cluster processes information with speeds comparable to any HPCC available today.

| GENERAL REQUEST | MANAGE YOUR ACCOUNT | ABOUT BIGDAWG | USING BIGDAWG |

Use the General Request Form to request services, hardware, and/or software from the RCC. If you need assistance or have questions regarding BigDawg access or use, contact the RCC by email.
