The SIUC Human Subjects Committee is responsible for reviewing all human-subjects research projects, *regardless of discipline or funding source*, conducted by individuals affiliated with SIUC, including students. This review protects not only the human subjects involved in a research project, but also the researcher and, by extension, the University. **No research involving human subjects should be conducted before determining if the research is subject to HSC review and, if so, receives HSC approval.**

Does your project require HSC review? [START HERE](#)
